

# Raised Floor Tile Lifter

**These powerful lifters offer a strengthened hold by utilizing lever actuated suction cups. Their low profile and versatility make them perfect for lifting and carrying an access floor panel for short distances with the minimum amount of effort.**

For some people, bending over or kneeling down to lift floor tiles causes back or arm strain. With the assistance of an Ergonomist designed Standup Floor Tile Puller the lifting of floor tiles is made effortless. The Floor Lifter is designed to be lightweight, simple to use and portable, while still being rugged. You will find that it makes repeated lifting of raised floor tile panels fast, easy, and safe. The Lifter is available in three lengths to allow users with different heights to find a model that best suits them. All models hang vertically from our AJ-1 or AJ-Redstripe Wall Brackets.
