

Independent Integrated Systems Test (IST)

AJ+2 work with clients to provide audits at a number of levels - for technical staff right through to the board level. In most situations we tailor our Data Centre audit reports to meet client's exact requirements and address specific issues or concerns. A list of typical key areas that would be considered for an audit are shown below.

- Site location
- Energy Efficiency
- Data Centre layout
- Resilient services (data, power and water)
- Building design, structure and adjacencies
- Mechanical and electrical plant
- Age of system
- Functionality
- Maintenance regime
- Scalability and flexibility
- Capacity
- Remaining serviceable life
- Power supplies
- UPS, generator/s and transformers
- Wiring
- Risk
- Hidden costs
- Data Centre management
- Data Centre security
- Data Centre and operational strategy
- Provide detailed report of findings
- Identify strengths and weaknesses
- Summarise ways to improve and enhance the facility

Other Products:

- UPS
- Static Switches
- Inverters
- DC Standby
- Datacentre software
- Blanking Panels
- LV Switchboards
- IT Enclosures
- Rack PDU's
- Datacentre Audits
